

JUNIT Testing

Since I was unable to run JUNIT tests on GUI aspects, I tested all my getters and setters for my createPatient class. The following screenshot shows the result of these tests:

Finished after 0.02 seconds

Runs: 4/4  Errors: 0  Failures: 0

▼  com.HospitalSystem.TestCreatePatient

-  testPatientLastName (0.001 s)
-  testPatientName (0.000 s)
-  testPatientID (0.000 s)
-  testPatientAge (0.000 s)

The result of the JUNIT tests show that my getters and setters are performing as expected.
